Working Groups Recently started

DASPI - **D**ata **A**nalytics for **S**PICE **I**mplementation

Purpose / Objective: Operational data from Automotive SPICE®-compliant projects to demonstrate the advantages of the model.

SPICE4AI

Purpose / Objective: Development of a standardized framework and guidelines for assessing Artificial Intelligence (AI) systems within the context of process assessments.

UCAT - **U**nification of **C**ompetent **A**ssessor **T**raining

Standardize the training of Competent Assessors, one CA training for all assessors

You are cordially invited to support us!

Focus Topics

Specific actions currently being implemented:

- Model establishment and rollout for Data Management SPICE and ISO/IEC 33061
- Guideline development for AI (SPICE4AI working group)
- Improvement of training material (reducing the number of slides, focusing on the essential content, preparing the course for participants)
- Standardization of the Competent Assessor Training (UCAT working group)

Strategic Issues and Cooperations

We expand our offer of technical training courses.

- We have signed the Memoranda of Understanding with iREB and iSAQB
- The white paper has been created
- A partnership with ISCN has been established
- The aim is to develop a cross-organizational, modular training framework that:
 - Offers the automotive community an integrated set of skills
 - Enables individualized career development paths
 - Promotes role flexibility
 - Enhances the quality of development projects
 - Supports the professional development of assessors

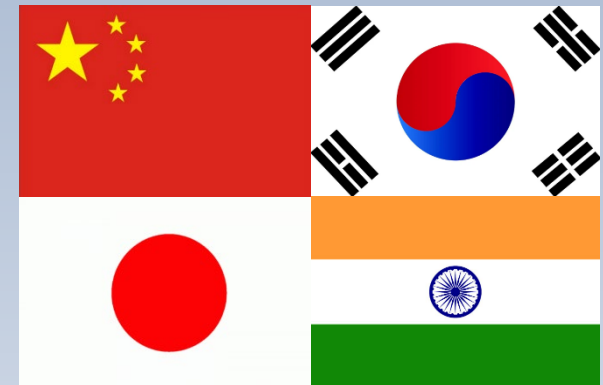

Strategic Issues and Cooperations

We strengthen our commitment in Asia.

- iNTACS will install an iNTACS China officer
- The contracts are currently being prepared
