## INTACS® certified Process Expert ISO/IEC 33061

### Objective

This training is the preparation course for the INTACS® certified Process Expert ISO/IEC 33061 examination. ISO/IEC 33061 is used to evaluate and improve development processes in the non-automotive industry. It is the basic standard recommended for the evaluation of development projects at non-automotive OEMs and their suppliers.

You get to know the model and learn about the interpretations of most of the processes from ISO/IEC 33061, which you need for your daily work and to implement process improvement in system and software engineering.

### Content

- Basic introduction to INTACS® and INTACS
- Basic Information for Assessor Candidates
- Introduction and Overview of the Process Assessment Model
- Assessment Process
- Quality Dimension
- Technical Management Processes
- Technical Processes
- Organizational project-enabling processes
- Agreement Processes

### Target Audience

- Experts in projects want to improve controllability, performance and aim achievement
- People are planning on becoming certified assessors (N.B.: the certification as an INTACS® certified Process Expert ISO/IEC 33061 is the prerequisite to continue with the next step in becoming an INTACS® certified Provisional Assessor ISO/IEC 33061).
- Quality and project team members who need to ensure that the requirements of the ISO/IEC 33061 Process Assessment Model are met within the project.
- Process Owners and process improvement team members who need to ensure that ISO/IEC 33061 requirements are covered by the organization's process landscape.

### Duration

- 3 days

### Preconditions

- Participants should have several years of professional experience in industry (e.g. software/system development, project management, quality management, etc.)

### Constraints

- Maximum of 12 participants per training

## Exam

- Passing the exam is a prerequisite for participation in the ECQA certification process
